

Uncovering The Gaming Industry's Hidden Gems: A Comprehensive Analysis of Video Game Sales

1.Introduction

A Video game is an electronic game that involves interaction with a user interface or input device (such as a joystick, keyboard) to generate visual feedback from a display device, most commonly shown in a video format on a television set, computer monitor, flat-panel display or touch screen on handheld, or a virtual reality headset, hence the name....

1.1-Overview

Video game are popular all over the world. They are enjoyed by all ages. Video game industry is huge and the spending on video games per year is huge too. Sales different type of games vary widely between countries due to local preference. According to the market research firm super Data, as of May 2015, the global games market was worth USD 74.2 billion. By region, North America accounted for 23.6 billion dollars, Asia for 23.1 billion dollars, Europe for 22.1 billion dollars and south America for 4.5 billion dollars. There are different genre, publishers and platform for video games. This project relates to the sales of these video games based on different regions and analyses the sales.

1.2-purpose

In this the main goal was to analyze the sales of video games in different regions. The regions are North America, Europe, Japan, other countries (combined) and then the global sales (total of all regions). The main ideas was to visualize the sales for different genre, publishers and platform. This would give the basic idea about the most popular genres, publishers, and platforms amongst all.

2.Problem Definition & Design Thinking

Problem statement:

Despite the growing popularity of video games, many hidden gems in the gaming industry's or not receiving the attention they deserve due to poor marketing or lack of exposure. A comprehensive analysis of video games sales is need to identify these hidden gems and promote them to the wider gaming community

Design thinking:

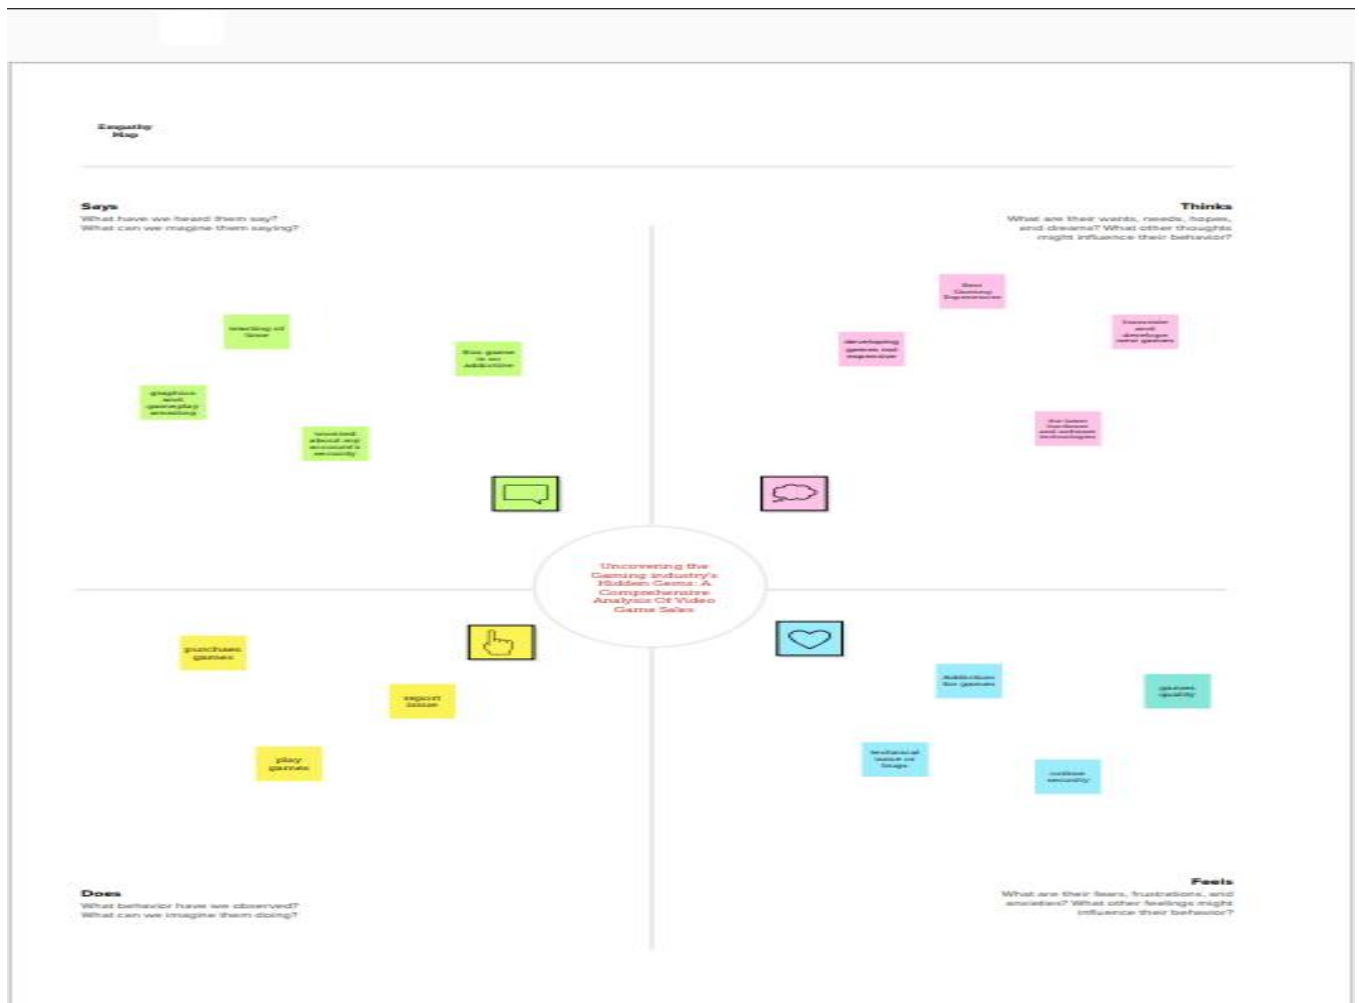

1. Empathize:

the first step is to empathize with the gamers and understand their preference, needs, and challenges. This can be done by conducting surveys, interviews, and focus groups to gather from the gaming community

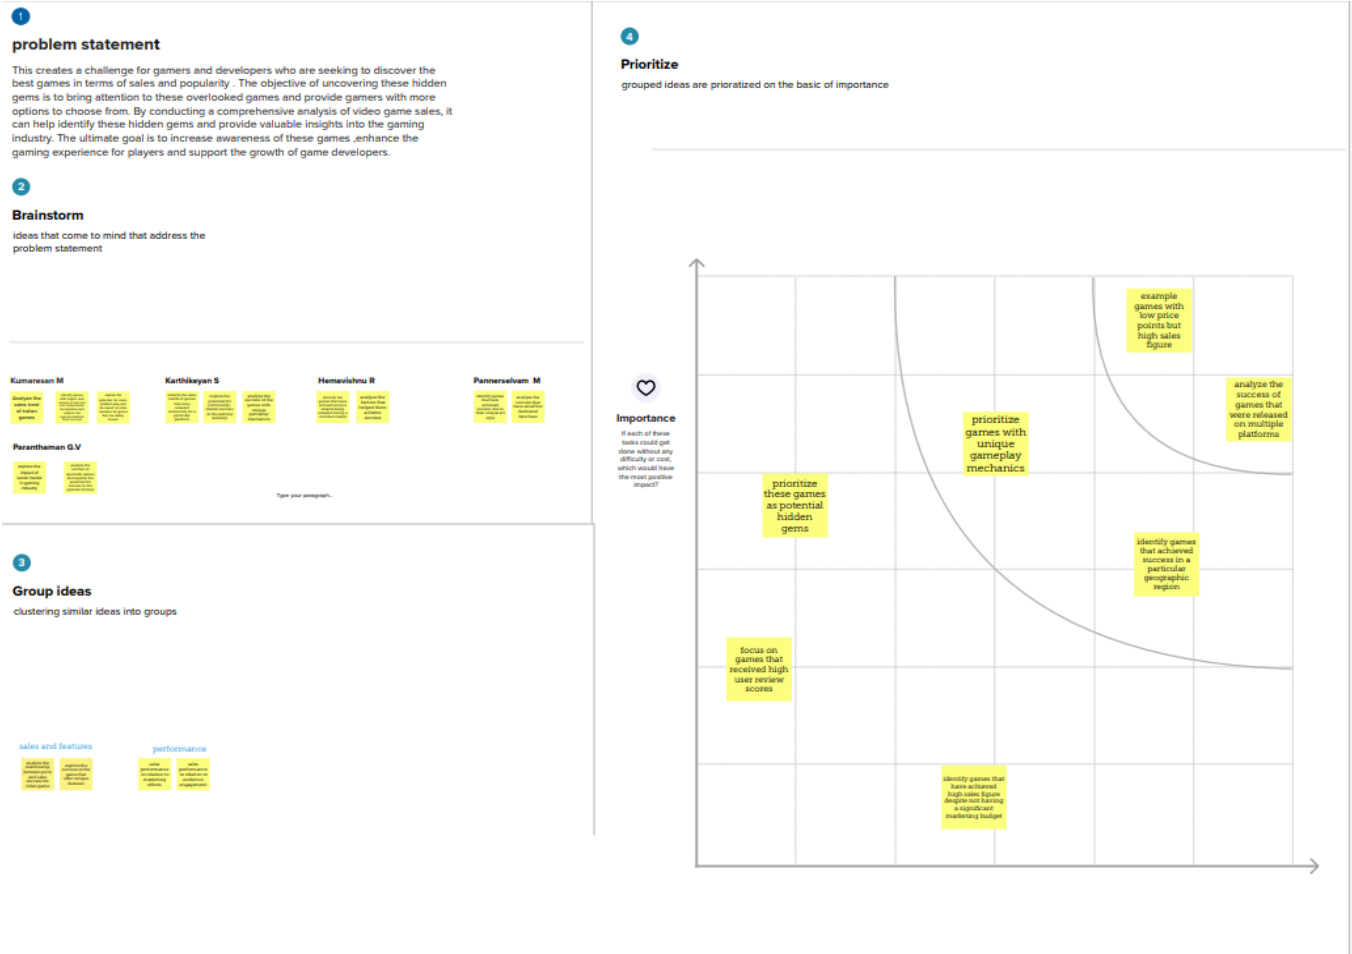

2. prototype:

We can create a prototype of our solution and test it with a small group of gamers to gather feedback and improve the design

2.1 Empathy Map

2.2-Ideation & Brain Storming Map

3.Result

3.1-Data Collection & Extraction from Database

For this project the data was collected from Kaggle(www.kaggle.com). This data gives us the idea about the sales of video games in different of the world. The distribution is with respect to genres, publishers and platforms

Rank: Ranking of overall sales

Name: Name of the video game

Platform: Platform on which the game was released or is playable

Year: Year in which the game was released

Genre: Genre the game belongs to

Publisher: Name of the publisher who created the game

NA_Sales: Sales in north America

EU_Sales: Sales in Europe

JP_Sales: Sales in Japan

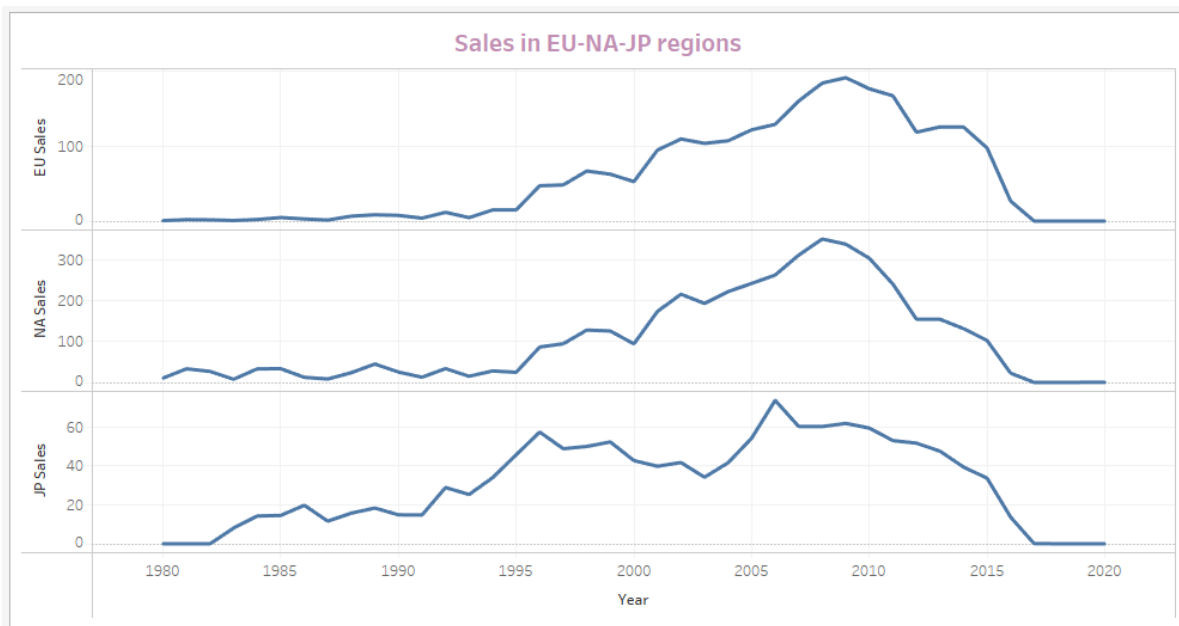

Other_Sales: Sales in other countries

Global_Sales: Global sales

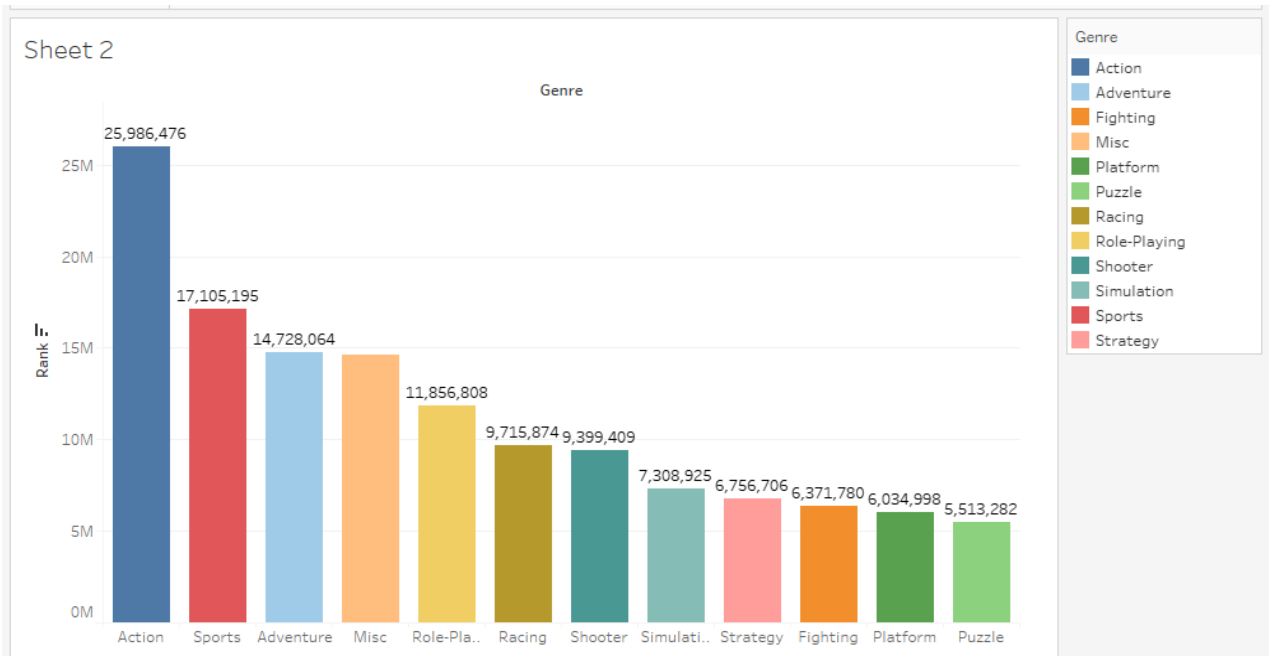

3.2 Data Visualization

The number of unique visualizations that can be created with a given dataset. Some common type of visualizations that can be used to analyze the performance and efficiency of Radisson, Hotels include bar charts, line charts, heat maps, scatted plots, pie charts, maps etc...

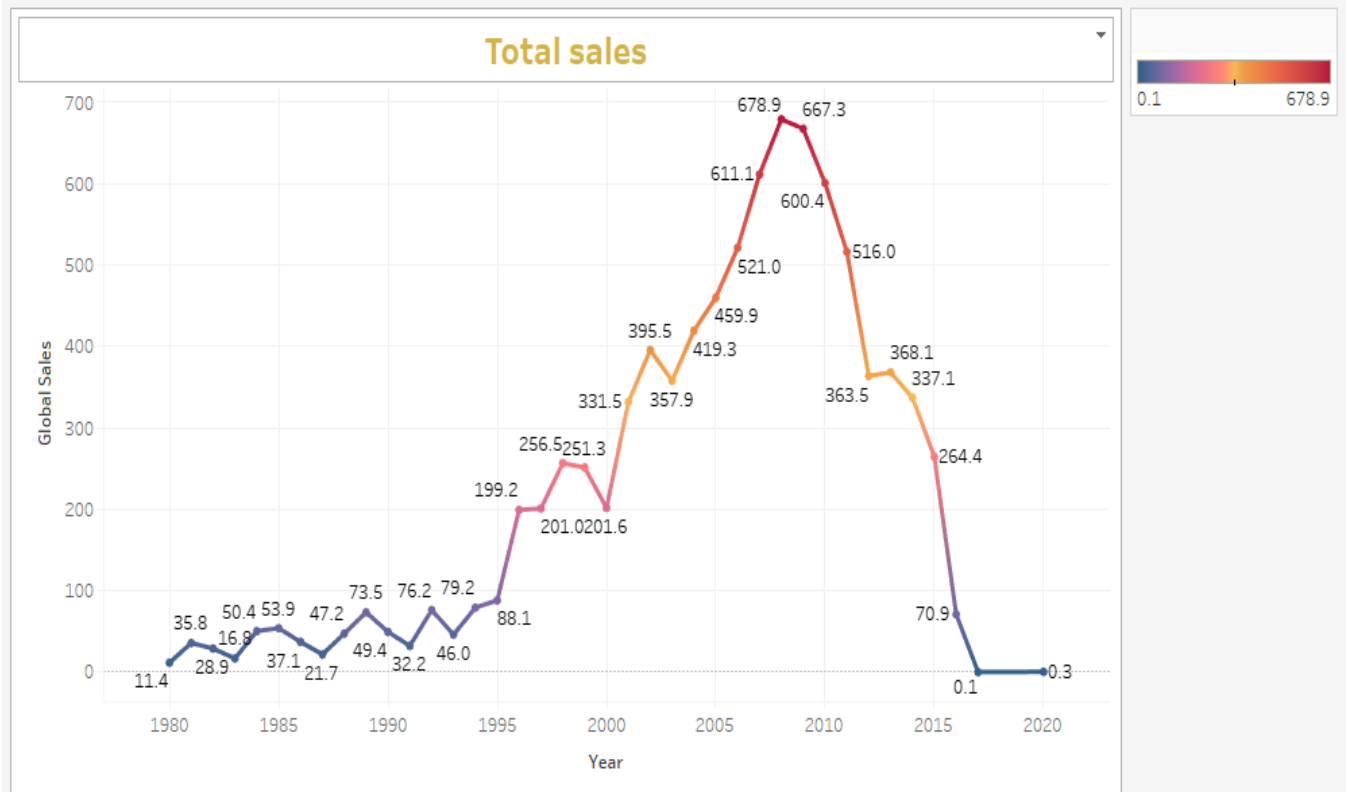

3.3.1-Sales in different region analysis

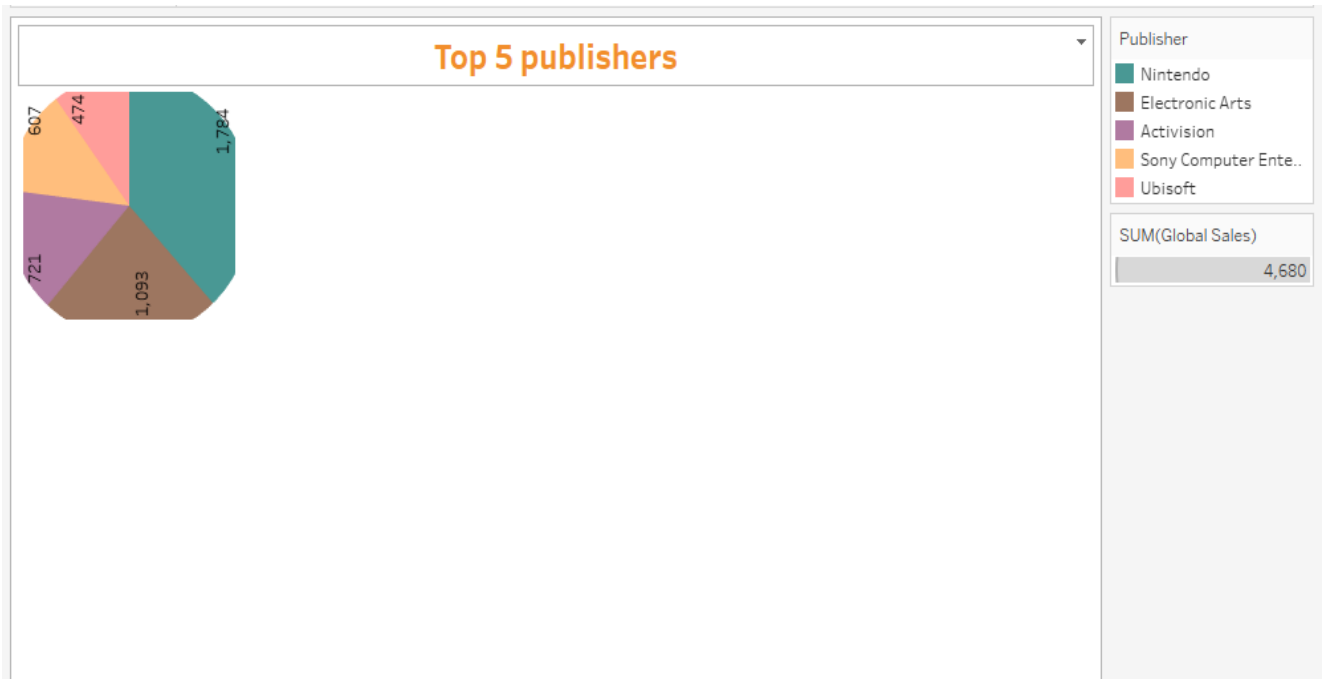

3.2.2-Genre with Rank Analysis

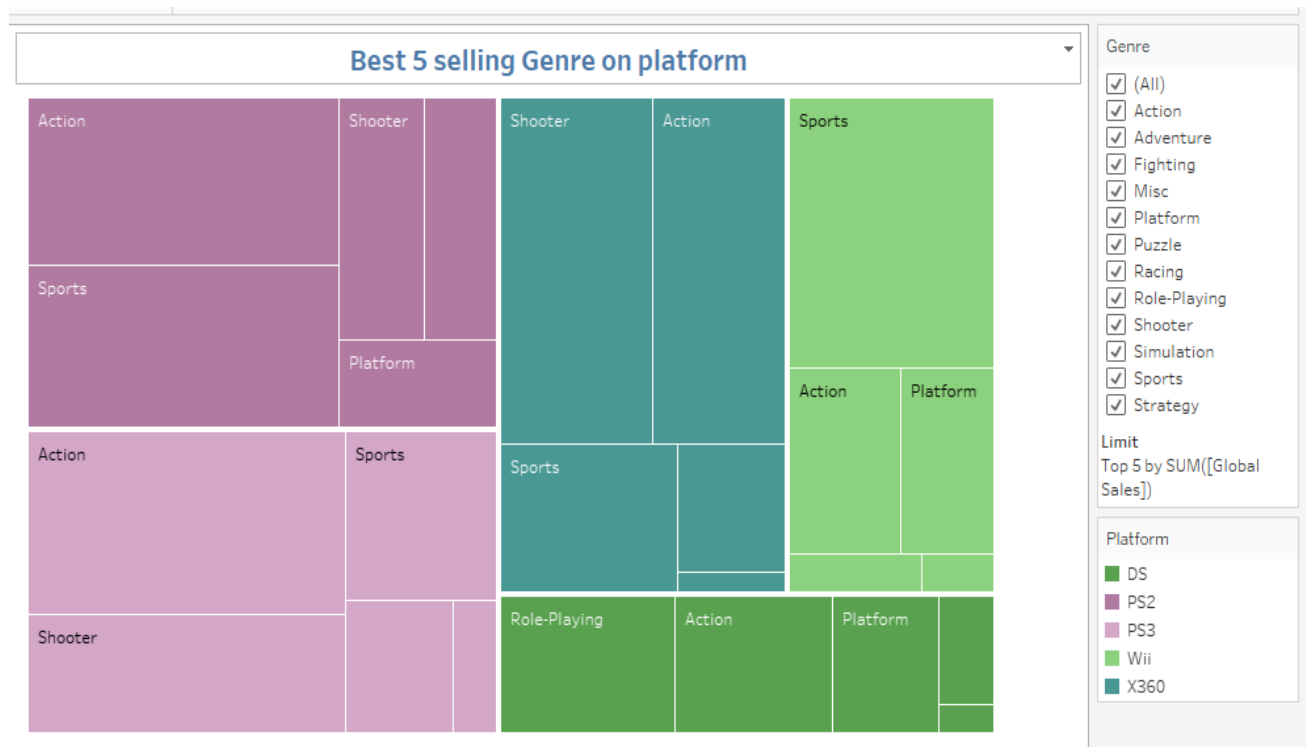

3.2.3-Total Sales Analysis

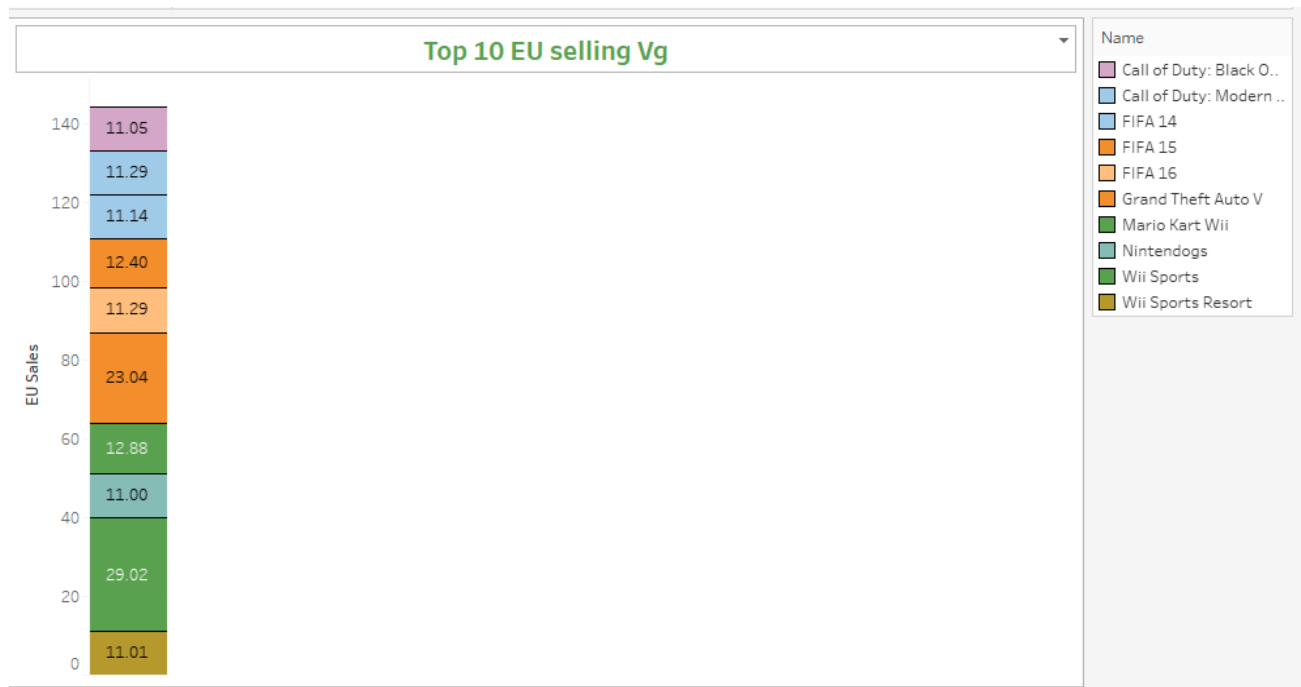

3.2.4- Top 5 publishers Analysis

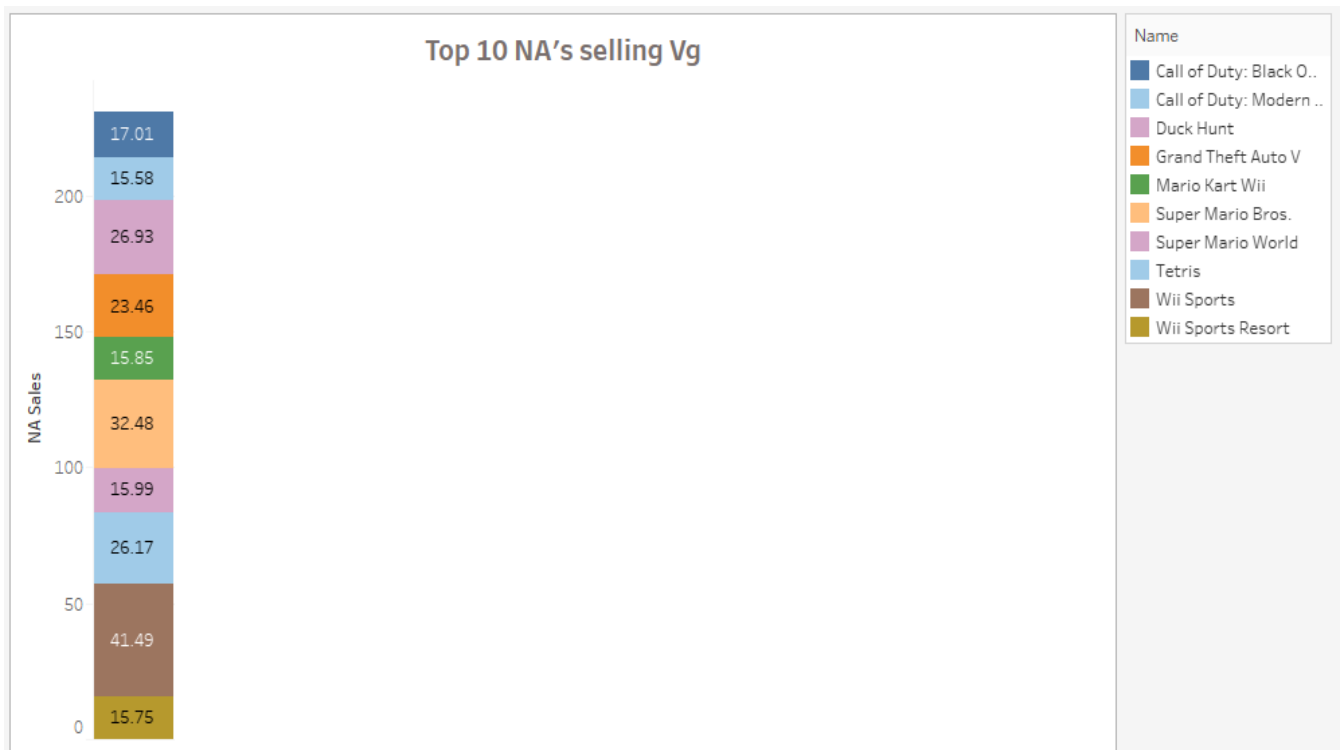

3.2.5- Best 5selling genres on platform Analysis

3.3.6-Top 10 EU selling video games Analysis

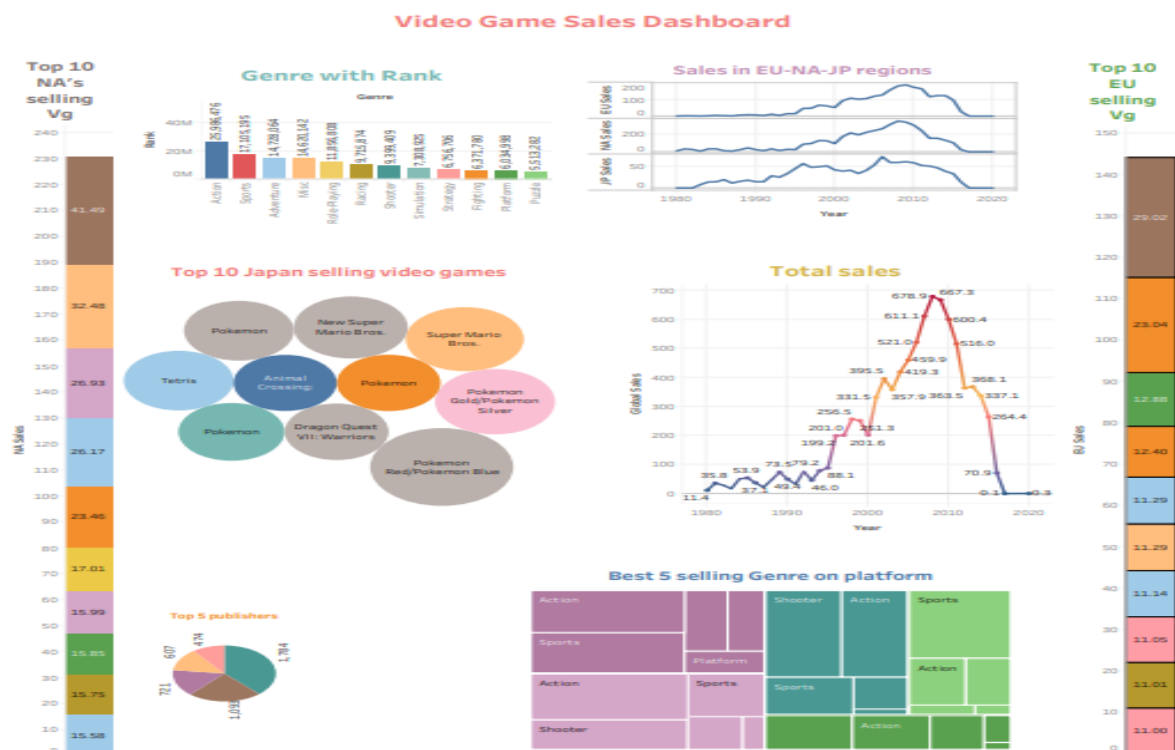

3.2.7-Top 10 NA selling video games Analysis

3.2.8-Top 10 Japan selling video games Analysis

3.3-Dashboard

By the above data Visualization we can say that action games on DC or playstation for that matter are the most popular and are the ones responsible for maximum sales all over the globe.

4.ADVANTAGES & DISADVANTAGES

Video games have become a stable in our modern, technologically driven culture. While kids have been crazy about these for decades, the introduction of smart phones and mobile gaming systems has pushed them to new heights

4.1-Advantages of video games

1.Problem-solving skills:

Video games can enhance problem-solving skills, as players are often required to navigate through challenges and obstacles.

2.Strategic thinking:

Many video games require strategic thinking and decision-making skills, which can be useful in everyday life.

3.Creativity and imagination:

Video games often involve storytelling, character development, and world-building, which can encourage creativity and imagination.

4.Career benefits:

Some video games can help develop skills that are useful in certain careers, such as graphic design or game development.

5.Overcoming disabilities:

Video games can be helpful for individuals with disabilities, such as dyslexia or ADHD.

6.Entertainment value:

Finally, video games can provide an enjoyable and entertaining pastime, allowing individuals to relax and unwind after a long day.

4.2-Disadvantages of Video games

1.Addiction:

Video game addiction is a real issue for some individuals, leading to excessive use and negative consequences.

2.Physical health problems:

Sitting for long periods of time while playing video games can lead to physical health problems, such as obesity, back pain, and carpal tunnel syndrome.

3.Behaviourl problems:

Some studies suggest that playing violent video games can lead to aggressive behaviour, although the link is not yet fully understood.

4.Sleep disturbances:

Playing video games before bed can lead to sleep disturbances, such as insomnia or nightmares.

5.Risk of cyberbullying:

Online gaming can increase the risk of cyberbullying and harassment, especially for children and adolescents.

6.Social isolation:

Excessive video game use can lead to social isolation, as individuals may spend less time interacting with others in person.

7.Eye strain:

Staring at a screen for long periods of time can lead to eye strain and fatigue.

5.APPLICATIONS

1.Education:

Video games can be used as educational tools to teach various subjects such as science, math, history, and literature. These games can make learning more engaging and interactive.

2.Physical Therapy:

Video games can be used in physical therapy to help patients with injuries or disabilities improve their motor skills, balance, and overall physical fitness.

3.Mental Health:

Video games can be used to help individuals cope with mental health issues such as anxiety, depression, and PTSD. These games can provide a sense of calm and relaxation, and can also help individuals build coping skills.

4.Military Training:

Video games can be used in military training simulations to prepare soldiers for combat scenarios, allowing them to practice tactics and strategies in a safe and controlled environment.

5.Advertising:

Video games can be used as a marketing tool to promote products and services. For example, a car company may create a racing game to showcase their latest model.

6.Rehabilitation:

Video games can be used in rehabilitation to help patients recover from injuries or surgeries. These games can help patients relearn skills and build strength.

6.CONCLUSION

video games have a wide range of practical applications beyond entertainment. From education and physical therapy to military training and historical preservation, video games can be utilized to serve many different purposes in our society. As technology continues to evolve, we can expect to see even more innovative uses for video games in the future. Whether it's helping people learn new skills, cope with mental health issues, or simply have fun, video games have the potential to make a positive impact on our lives.

7.FUTURE SCOPE

The future scope of video games is vast and exciting. As technology advances, we can expect to see video games become more advanced and immersive than ever before. Here are some potential future applications of video games:

FUTURE OF VIDEO GAMES:

1.Virtual Reality:

Video games are already utilizing virtual reality technology, but we can expect to see even more advanced VR games in the future that offer more realistic and immersive experiences.

2.Healthcare:

Video games are already being used in healthcare for physical and mental therapy, but in the future, we can expect to see more games being developed specifically for healthcare purposes such as treating chronic pain or assisting in surgeries.

3.Education:

As video games become more sophisticated, they will continue to be an effective tool for education. We can expect to see more video games designed specifically for teaching purposes that offer interactive and engaging learning experiences.

4.Artificial Intelligence:

The integration of artificial intelligence in video games will continue to grow, making the games much smarter and more challenging. AI will also enable game developers to create more realistic and believable characters.

5.Social Impact:

Video games have the potential to make a significant social impact, and we can expect to see more games being developed with a focus on social impact. These games will address various social issues such as climate change, inequality, and poverty.

<h2>CONCLUSION</h2></div>
```

```
<div class="content">
```

```
<ul>
```

```
<li> <a href="">Conclusion-1</a> </li>
```

```
<p>By the above data we can say that action games on DC or  
playstation for that matter are the most popular and the ones  
responsible for maximum sales all over the globe. </p>
```

```
<li> <a href="">Conclusion-2</a></li>
```

```
<p>Also as these games are so abundant and popular(ranking  
wise),variation in the sales of one or two such games would not cause  
significant change in the overall sales.</p>
```

```
<li> <a href=" ">Conclusion-3</a> </li>
```

```
<p> Well, there are lots of efforts going into creating a single game  
and due to modern era mobile games other platforms are getting  
deprived of the attention which had created a lot of awesome  
experiences for the gamers from 1980-2020. </p>
```

```
</ul>
```

```
